Subject: Community Meeting Reflections
removed.txt

Sarah, I haven't had a chance to talk to you since the community meeting, but I wanted to apologize for the SPS enhanced evaporation portion of the meeting. It was not our intention to create confusion or throw everyone a curveball with that information. We should have provided some additional talking points in the pre-meet for all of us to digest, but we didn't think it was going to be that big of a deal. Harry came undone and he got Angeles fired up and the whole thing got pretty blown up. I would never do anything intentional to submarine you or blow up a meeting you planned. So, if you got some heat because of all that, I am sorry.

Along those lines, it appears that Angeles is questioning the CI group participants, whether we have the right folks involved, and our ability to prepare and proceed with the tasks we have ahead of us. We'll do our best to support you and the groups success moving forward, but if you think we're not pulling our weight or holding you back, just let me know and we'll try to step it up. Jeryl and I have a ton of other work going on right now, but our priority is Anaconda. We'll look for the Doodle Poll to schedule the next meeting and go from there. Let me know if you have any concerns or need extra support. Thanks.
